Wissenschaften Hamburg
Hamburg University of Applied Sciences

1-7 Nov online

global & innovative
democratic & interactive
up-to-date & informative

Scientists and practitioners from all over the world show you during the internet conference

www.CLIMATE2010.net

the impacts of global climate change on the sustainable management of water resources.

DAIMLER

Learn, discuss and interact: The worldwide scientific online climate conference opens its virtual doors at www.CLIMATE2010.net from 1-7 November 2010.

Authors from all over the world present papers in four categories:

- Geo-chemical and physical impacts of climate change on water supplies
- Socio-economic aspects of climate change in relation to water supplies and use
- Climate change, policy-making and sustainable water use
- Projects which focus on addressing the links between climate change and sustainable water use, including educational and awareness-raising initiatives

Participants from all over the world have free access to latest climate know-how.

- The IT requirements for participation are kept low and the design lean as to allow easy access also for all kinds of computers and internet connections.
- Interactive Features such as discussion fori, chats, videos etc. foster worldwide networking and information exchange.

The online climate conference »CLIMATE 2010« takes place online only.

- There are no CO₂ emissions due to travel to the venue;
- Find current climate know-how in a »Climate library«, explore »Climate projects all around the world«, also there's a designated section for educators with »Climate know-how at your fingertips«.

Organizer: HAW Hamburg
